

Overdose deaths are preventable. 190 people die from preventable overdose everyday.

We support clients through psychoeducation, intervention, harm minimisation, safety planning and overdose prevention strategies focusing on health and wellbeing.

Using short-term outreach interventions, we help with treatment access, counselling, care and recovery coordination, inpatient and outpatient detox and rehabilitation options.

Also, we provide secondary consult to external professionals regarding high-risk clients at risk of overdose, including harm minimisation and treatment pathways.

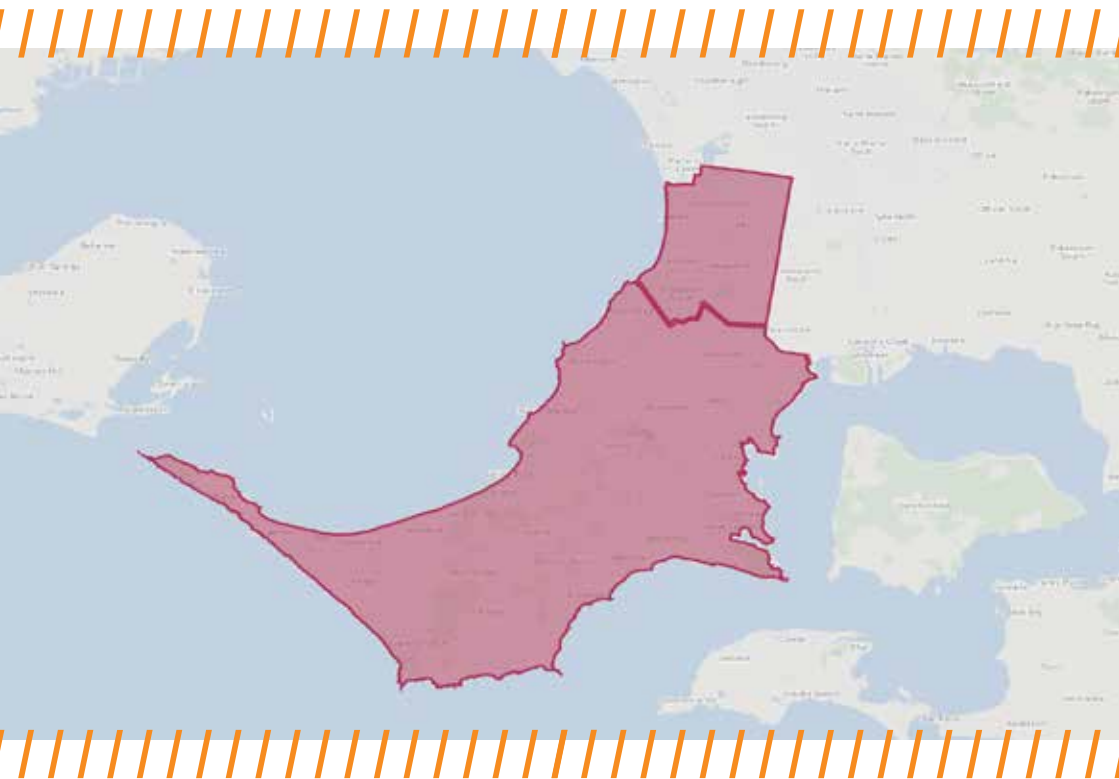

Priority referral pathway for individuals aged 16 and over, who are high risk of overdose from substances.

TaskForce

Where hope finds help.

This program operates across the LGAs of
Frankston and Mornington Peninsula.
